

Department for Education School and College Performance Tables - January 2019

A Level Progress Score The Progress Score column shows how much progress students made between the end of Key Stage 4 and the end of their A Level studies compared to similar students across England. The scores are calculated by comparing the A Level results of students at Greenhead with the A Level results of all students in schools and colleges across England who started with similar results at the end of Key Stage 4. A score above zero means students made *more* progress, on average, than students across England who achieved similar results at the end of Key Stage 4.

Further columns are shown below which demonstrate Greenhead College's success in two additional government performance measures:

Achieving AAB or higher in at least two facilitating subjects Facilitating A Levels are subjects that are commonly required for entry to leading universities. Facilitating subjects offered at Greenhead are: Biology, Chemistry, English Literature, Geography, History, Mathematics, Further Mathematics, Modern Languages and Physics.

Average result This tells you the average grade and average points that students achieved per A Level entry. The performance tables give a points value to all qualifications in order to compare qualifications of a different level, size and grading system.
