

## WHAT IS ENRICHMENT?

Every student at college should participate in our award-winning Enrichment programme. The aim is to provide many opportunities for you to develop new interests, boost your determination to succeed, support your mental and physical wellbeing, and develop employability skills. Those who interview for places in higher education, training schemes and jobs want evidence of wider achievements at college, not just good grades. This means enrichment is very important when applying for university places, apprenticeships and jobs.
